

AN OSRAM BUSINESS

## ENVIRONMENTAL POLICY STATEMENT

**Ring Automotive Ltd recognises that, like all business, our operations affect the environment.**

**We accept our responsibility to the community and to future generations.**

**We are committed to a positive approach to all environmental issues.**

We believe that managing our environmental impact must rank amongst the highest of our business objectives. The following principles will be used to guide us in this process.

We will operate in a manner which acknowledges that resources are not limitless by the following:

- promoting use of materials from sustainable sources
- increasing use of recycled materials
- minimising waste material

We will operate in a manner that recognises the impact of manufacturing and disposal on the environment by the following:

- reducing the use of hazardous materials in our products and processes
- increased reuse or recycling of our own waste materials
- improving the recycling potential of our products
- improving environmental management of our sites.

We will consider environmental matters in all our business decisions.

We recognise legal requirements as a starting point. Where practicable we will better them.

We will work closely with suppliers and customers to improve performance.

We will review our environmental performance against objectives at board level on a regular basis and publish results.

All our staff will be encouraged and trained to not only comply with this policy but also to develop ideas that contribute to improved performance.

A handwritten signature in black ink, appearing to read "A. Gratton".
